

BUILD YOUR AI CEO — THE COMPLETE SETUP GUIDE

20 Power Cron Jobs for Your AI CEO

Build Your AI CEO: The Complete Setup Guide

[CRON JOB ADD-ON — DOWNLOAD PACKET](#)

Part of the Build Your AI CEO — Cron Job Add-On Module

These are the 20 highest-impact cron jobs you can set up for your business. Split into two sections: Business Operations (keep your company running smoothly) and Revenue & Money (put more cash in the door).

For each job, you'll find the recommended schedule, what it does, and a prompt template you can customize.

SECTION 1: BUSINESS OPERATIONS

1. Daily Morning Briefing

Schedule: Every day at 7:00 AM

What it does: Generates a summary of overnight emails, key metrics, calendar events, and top priorities for the day. Delivers it to your Discord or email before you start work.

Why it matters: You start every day informed and focused — no scrambling.

Prompt template:

Run my daily morning briefing: summarize any key emails received overnight, list today's calendar events, pull top metrics from active ventures, and surface the 3 highest-priority actions for today. Post the summary to my #morning-briefing Discord channel.

2. Social Media Content Scheduler

Schedule: Daily at 8:00 AM

What it does: Reviews the content queue, generates new posts if the queue is low, and schedules them across platforms (X, LinkedIn, Instagram, TikTok).

Why it matters: Keeps your brand active and consistent without daily manual effort.

Prompt template:

```
Review the social media content queue. If fewer than 3 posts are scheduled for today, draft new posts for [platforms] based on recent content themes. Queue them for posting and confirm what's scheduled.
```

3. Lead & Sales Follow-up

Schedule: Every 2 hours during business hours (8 AM – 6 PM)

What it does: Checks the CRM for new leads, sends personalized follow-ups to warm contacts, and flags any leads that haven't received a response within 24 hours.

Why it matters: Speed-to-lead wins deals. Most businesses lose sales by being too slow.

Prompt template:

```
Check GoHighLevel for new leads in the last 2 hours. Send personalized follow-up messages to any new leads who haven't been contacted. Flag any warm leads that have been waiting more than 24 hours without a response.
```

4. Financial Snapshot

Schedule: Daily at 9:00 PM

What it does: Pulls daily revenue, expenses, and Stripe/PayPal updates. Generates a brief daily financial report.

Why it matters: You always know where you stand financially — no surprises.

Prompt template:

```
Pull today's financial snapshot: total revenue collected (Stripe), any new expenses logged, and current cash position. Generate a concise daily financial report and post it to my #financial-reports Discord channel.
```

5. Task & Project Health Check

Schedule: Daily at 6:00 PM

What it does: Reviews all open tasks, flags overdue items, sends reminders to relevant team members, and updates project status.

Why it matters: Nothing falls through the cracks. Every open loop gets flagged daily.

Prompt template:

```
Review all open tasks and projects. Flag any items that are overdue or haven't been updated in more than 48 hours. Send reminders as needed and post a project health summary to my #operations Discord channel.
```

6. Competitor & Market Monitoring

Schedule: Daily at 10:00 AM

What it does: Scans for competitor news, industry updates, keyword mentions, and trending topics. Summarizes key insights in a brief report.

Why it matters: Stay ahead of the market without spending hours on research.

Prompt template:

```
Scan for news and updates related to [your industry/competitors]. Identify any significant moves, new offers, or pricing changes. Summarize the top 3-5 insights and post them to my #market-intel Discord channel.
```

7. Content & Newsletter Creation

Schedule: Weekly on Wednesday at 9:00 AM (or daily if high-volume)

What it does: Researches relevant topics, drafts the next newsletter issue or content batch, and queues it for review.

Why it matters: Consistent content drives traffic, trust, and sales — without you writing everything manually.

Prompt template:

```
Research the top trending topics in [your niche] this week. Draft a newsletter issue of approximately 400 words covering the most relevant insight for our audience. Save the draft to [file location] for review.
```

8. Client / Customer Check-ins

Schedule: Weekly (e.g., every Tuesday at 10:00 AM)

What it does: Sends automated check-in messages to active clients, satisfaction surveys, or upsell opportunities for relevant upgrades.

Why it matters: Retention is cheaper than acquisition. Proactive check-ins reduce churn and open upsell opportunities.

Prompt template:

```
Review active client accounts. Send a brief, personalized check-in message to any client who hasn't been contacted in the last 7 days. Note any clients who may be candidates for an upsell conversation.
```

9. Performance & KPI Report

Schedule: Weekly — every Monday at 8:00 AM

What it does: Compiles weekly performance metrics across all active ventures — revenue, leads, conversions, content performance — and delivers a full executive summary.

Why it matters: Weekly visibility keeps the business on track. You see what's working and what needs attention before it becomes a problem.

Prompt template:

```
Compile this week's KPI report: total revenue, new leads, conversions, top-performing content, and any notable wins or problems. Format it as a clean executive summary and post it to my #weekly-kpi Discord channel.
```

10. Backup & System Maintenance

Schedule: Nightly at 2:00 AM

What it does: Runs backups of memory files and key data, cleans old logs, and checks system health.

Why it matters: Protects everything you've built. A single system failure without backups can set you back weeks.

Prompt template:

```
Run nightly system maintenance: back up all memory files to [backup location], clean logs older than 30 days, and run a system health check. Report any errors or anomalies to my #system-health Discord channel.
```

SECTION 2: REVENUE & MONEY

These are ranked by revenue impact and speed of results.

11. Abandoned Cart Recovery 🌟 TOP TIER

Schedule: Every 2–4 hours

What it does: Scans your store or CRM for anyone who started a checkout and didn't complete it. Automatically triggers a personalized recovery email or SMS with a compelling incentive.

Why it matters: This is one of the highest-ROI automations you can run. Industry averages suggest 10–15% of abandoned carts are recoverable. That's money already in motion — you just need to close the loop.

Prompt template:

```
Check [store/CRM] for any abandoned carts or incomplete checkouts in the last 4 hours. For each one, trigger a personalized recovery message via email or SMS. Include a limited-time incentive if available. Log all recovery attempts.
```

12. Invoice & Payment Chasing 🌟 TOP TIER

Schedule: Daily + again 3 days after due date

What it does: Sends polite, professional payment reminders for outstanding invoices. Escalates the tone after the due date passes. Flags any invoices that remain unpaid after escalation.

Why it matters: Late payments kill cash flow. This cron job removes the awkwardness and handles it automatically — professionally and consistently.

Prompt template:

```
Check for any outstanding invoices due today or overdue. Send a polite payment reminder to each. For any invoices 3+ days past due, send an escalated follow-up. Flag any invoices that remain unpaid after two reminders for manual review.
```

13. Lead Reactivation Campaign 🌟 TOP TIER

Schedule: Weekly (e.g., every Thursday at 10:00 AM)

What it does: Reaches out to cold or inactive leads with a fresh angle — new offer, recent case study, updated service, or time-limited incentive.

Why it matters: Most businesses sit on thousands of dollars in their cold list. These people already said yes once — they just went quiet. A single reactivation campaign regularly converts 5–10% of cold leads.

Prompt template:

Pull leads from [CRM] who haven't engaged in the last 30+ days. Send a reactivation message using our current best-performing offer or most recent case study. Track opens and replies. Flag any responses for immediate follow-up.

14. Upsell / Cross-sell Sequences 🌟 TOP TIER

Schedule: Daily — triggered within 24 hours of a purchase

What it does: Identifies customers who recently purchased and automatically triggers the most relevant upsell or cross-sell offer based on what they bought.

Why it matters: Your hottest buyers are the ones who just paid you. The best time to make another offer is immediately after the first purchase — when trust is highest and momentum is active.

Prompt template:

Check for any new purchases completed in the last 24 hours. For each buyer, identify the most relevant upsell or cross-sell offer based on their purchase. Trigger the appropriate follow-up sequence and log the action.

15. Daily Deal / Offer Promotion 🌟 TOP TIER

Schedule: Every morning at 8:00–9:00 AM

What it does: Automatically promotes a daily or weekly offer, flash sale, or limited-time bundle to your email list or social audience. Keeps energy and urgency in your funnel at all times.

Why it matters: Consistent promotion = consistent revenue. Most businesses underpromote. This cron job makes sure your audience is always seeing an offer.

Prompt template:

Review the current offer calendar. Select today's featured offer or promotion. Draft a compelling promotional message and schedule it for delivery to [email list / social channels]. Track opens and clicks.

16. High-Intent Lead Alert + Outreach

Schedule: Hourly during business hours

What it does: Monitors for strong buying signals — specific page visits, form submissions, email link clicks, or high engagement patterns. Instantly flags you and begins automated outreach.

Why it matters: The difference between a closed deal and a lost one is often response time. This cron job ensures no hot lead goes cold.

Prompt template:

```
Check [CRM/analytics] for any leads showing high-intent signals in the last hour – including pricing page visits, demo requests, or multiple email opens. Flag each one immediately and trigger an outreach sequence. Notify me via Discord.
```

17. Affiliate Performance Nurturing

Schedule: Weekly (e.g., every Friday at 9:00 AM)

What it does: Reviews affiliate performance, sends personalized reports and encouragement to top affiliates, shares new promotional assets, and flags underperforming affiliates for re-engagement.

Why it matters: Affiliates who feel supported promote more. A weekly touchpoint keeps your best affiliates active and motivated.

Prompt template:

```
Pull this week's affiliate performance data. Send a personalized performance report to each active affiliate, highlight top performers, share any new promotional assets, and send a re-engagement message to affiliates who haven't promoted in 14+ days.
```

18. Revenue Leak Detection

Schedule: Daily at midnight

What it does: Scans for failed payments, expiring subscriptions, missed invoices, and broken automations. Triggers recovery actions for each issue found.

Why it matters: Most businesses lose 5–10% of revenue to silent leaks — failed charges that never retry, subscriptions that lapse, invoices that get lost. This cron job finds them every night.

Prompt template:

Run a nightly revenue leak scan: check for failed Stripe payments, expiring subscriptions, overdue invoices, and any broken automations. Trigger recovery actions for each issue. Generate a leak report and post it to my #revenue-health Discord channel.

19. Price Monitoring & Dynamic Pricing

Schedule: Daily at 7:00 AM

What it does: Monitors competitor pricing and market trends. Flags pricing gaps or opportunities and suggests adjustments to your own pricing.

Why it matters: Staying competitive on price — or knowing when you can charge more — is a direct revenue lever. This cron job does the research for you daily.

Prompt template:

Research current pricing for [competitors / market benchmarks] on [product/service category]. Compare to our current pricing. Flag any significant gaps or opportunities and post a brief pricing intelligence update to my #market-intel channel.

20. Content Repurposing & Distribution

Schedule: Daily

What it does: Takes top-performing existing content — posts, emails, videos — and repurposes it into new formats (clips, threads, graphics, blog summaries) then distributes across platforms.

Why it matters: You've already done the hard work of creating great content. Repurposing multiplies its reach without multiplying your effort. More content = more traffic = more revenue.

Prompt template:

Identify the top-performing content piece from the last 7 days based on engagement. Repurpose it into [3 social posts / an email / a short video script / a blog summary]. Schedule the repurposed content across [platforms] and log what was distributed.

Quick Reference: Schedule Summary

#	Cron Job	Schedule
1	Daily Morning Briefing	Daily — 7:00 AM
2	Social Media Scheduler	Daily — 8:00 AM
3	Lead & Sales Follow-up	Every 2 hrs (8 AM–6 PM)
